TABLE OF CONTENTS

EXECUTIVE SUMMARY

1 The French regulatory framework for online gaming

- [1.1 The objectives of the regulation in comparison with those of other countries](#)
- [1.2 Features and size of the French online gaming market](#)
 - [1.2.1 Product portfolio architecture](#)
 - [1.2.2 Market size](#)
 - [1.2.3 Turnover breakdown and value chain](#)
 - [1.2.4 Market demand: customer profiles and market potential](#)
 - [1.2.5 Supply structure](#)
- [1.3 The black market offer in France: market size and contrasting measures](#)
- [1.4 Guidelines for an effective regulation and containing black market](#)

2 Aligning gaming products to gaming demand

- [2.1 What impact do limitations to the product portfolio have on the size of the black market?](#)
- [2.2 How do constraints on sports betting line-ups affect the size of the black market?](#)
- [2.3 How do constraints on horse betting line-ups affect the size of the black market?](#)
- [2.4 How do constraints on poker affect the size of the black market?](#)

3 Adequate competition and economic supply-chain balance

- [3.1 What is the link between taxation rates, business sustainability and black market size?](#)
- [3.2 Does the product-related tax rate \(incl. VAT\) affect the size of the black market?](#)
- [3.3 Is the taxation of betting in France an effective model to create a sustainable market?](#)
- [3.4 Does a lower tax \(i.e. the Italian framework\) on betting affect the size of the black market?](#)
- [3.5 How does a cap on payouts affect the betting offer?](#)
- [3.6 Is the taxation of poker in France an effective model to create a sustainable market?](#)
- [3.7 Are betting constraints an effective way to prevent corruption in sports?](#)
- [3.8 What impact do sports rights \(and the related increase in betting taxes\) have on the effectiveness of anti-black market offers?](#)

4 Market control and safety of gaming transactions

- [4.1 Which tools ensure customer protection under the French gaming regulation?](#)
- [4.2 How are French controls of technical systems \(front-end system, ARJEL approval of software\) more or less effective than other control systems \(e.g. Italy\)?](#)
- [4.3 Is the French model effective in blocking access to .com websites?](#)

4.4 How to close accounts on black market websites?

4.5 Is the denying access to black market websites on search engines an effective measure?

5 **Effective communication**

5.1 How does the removal of advertising restrictions for the legal offer work?

5.2 How does removing advertising restrictions for licensees affect competition between legal and black market line-ups?

6 **Concluding remarks: Towards a more balanced gaming tax regime**

7 **GLOSSARY**
